Machine Learning

Seminar 11

For this seminar, we will organise a small machine learning workshop.

Below is the schedule:

- Open chat

  We will have a chat about a real-world machine learning application.

  Everyone will be welcome to contribute their ideas and options, and this will contribute to your job interview in the future.

  For this week, our topic will be about chatGPT.

- Student talk

  You will have the opportunity to talk about your work.

  For example, you can talk about one of the coursework, article review summary, previous project, or just share some of the machine learning ideas and skills.

  After each presentation, there will be time for questions.

  Please try to take this opportunity to develop your presentation skills – you will need it for your job interviews!

  No booking needed – just raise your hand when you are ready.
